

Basketball sell/lots — sort by team

200 cards · Scans 433-475 · Spurs–Rockets now LIVE (29 lots), only the 451-475 bulk pile left on HOLD · raw/ungraded July 2026 eBay-comp estimate

Total: \$200 – \$602 (typical ~\$401)

POSTED 2026-07-22 (round 1): Spurs through Miami Heat (22 lots/singles, 67 cards, \$150.37). During crop verification, Trey Murphy III (a Pelicans player) was found miscategorized under the Grizzlies lot — moved into the Pelicans lot before posting. **POSTED 2026-07-22 (round 2):** Denver Nuggets through Houston Rockets (7 lots, 25 cards, \$49.43) — JC physically confirmed Braun is 1 Chrome + 1 base (not 2 Chrome) and Watson is base (not Chrome), both already corrected below before this round. JC also flagged a Rockets card labeled base that was actually Chrome — that was Fred VanVleet (confirmed Topps Chrome by direct re-check of the scan); while on that same scan, Jalen Johnson (Hawks) was also found to be Chrome despite being labeled base, so that got corrected too. Immanuel Quickley (Raptors) was listed as 3 copies but only 2 physical appearances could be found across every scan in this itemized batch (433-450) — posted as 2, flagged. Kevin Durant's Rockets "base" listing was dropped entirely — no 3rd physical Durant card turned up anywhere in scans 433-450 beyond the 2 already reserved for KEEP; see the held-back note at the top of the table below. **Sort verdict: lot material, organized by team for easy bundling.** Base 2025-26 Topps/Chrome commons run \$1-4 raw even for current stars (confirmed via comps: LeBron \$1.50-4, Giannis \$0.99-2.24, Jokic \$1.15-2, Kawhi/Harden \$0.99-1.59) — nothing here individually clears a singles threshold. **Correction 2026-07-22:** the earlier note claiming Scan 436 and Scan 442 were a duplicate 9-card scan was wrong — re-verified all 15 original scans directly and that Salaün/Washington/Ighodaro/Monk/Isaiah Joe/Agbaji/Watson/Bane/Isaiah Thomas set is really Scan 433, a single unique scan with no duplicate. Scans 436 and 442 are two other, different real scans (Kyrie/Garnett/Kerr/Durant/Castle and DeRozan/Haliburton/Kuminga respectively). Quantities have been corrected accordingly (Isaiah Thomas x2, Nembhard x3, Ighodaro x3, Peyton Watson x2 base — not Chrome as first labeled). Team groups with 6+ cards (Pistons, Pacers, Grizzlies, Mavericks, Raptors) split cleanly into two 5-card-or-fewer lots each. **Scans 451-475 (~199 cards) are counted as one estimated bulk line for now** rather than itemized by team — that batch was large enough that a card-by-card team re-sort will follow once it's physically organized; the running total already reflects the full count. **Team/multi-player insert cards (duo inserts, team celebration cards) have been pulled OUT of every lot below** per JC's call — he's setting those aside to decide on separately later, so they no longer count toward any team's lot total or this sheet's grand total.
