Basis: raw/ungraded eBay estimate pulled 2026-07-12. This set is ~11 days old, so prices are soft and still settling; net sold prices run below current asking prices, so treat the typical column as realistic and the low column as quick-sale. The 49 base cards are essentially bulk (often better sold as a single lot than one-by-one). Real value sits in the numbered Elbecca Voss (purple /99, 1st appearance), the inserts, and the refractors. Not for sale — valuation only.
