

Basketball sell/lots — sort by team

302 cards · Scans 433-475 · HOLD, not posted · raw/ungraded July 2026 eBay-comp estimate

Total: \$303 – \$955 (typical ~\$617)

Sort verdict: lot material, organized by team for easy bundling. Base 2025-26 Topps/Chrome commons run \$1-4 raw even for current stars (confirmed via comps: LeBron \$1.50-4, Giannis \$0.99-2.24, Jokić \$1.15-2, Kawhi/Harden \$0.99-1.59) — nothing here individually clears a singles threshold. Confirmed duplicate: **Scan 436 and Scan 442 were the same 9-card scan taken twice** (Tidjane Salaün, PJ Washington Jr., Ighodaro, Monk, Isaiah Joe, Agbaji, Watson, Bane, Isaiah Thomas) — the extra copy from each has been removed from this total. Team groups with 6+ cards (Pistons, Pacers, Grizzlies, Mavericks, Raptors) split cleanly into two 5-card-or-fewer lots each. **Scans 451-475 (~199 cards) are counted as one estimated bulk line for now** rather than itemized by team — that batch was large enough that a card-by-card team re-sort will follow once it's physically organized; the running total already reflects the full count. HOLD: nothing posted, more scans pending.
