How to read this: prices are RAW/ungraded July 2026 eBay comp estimates (mostly active/OBO asks, sold will run a bit under). Justin Herbert, Travis Hunter, and James Conner carry wider ranges since exact parallel/insert wasn't confirmed from the photo — check the card back before listing. The bottom section is priced off the SAME insert tiers already confirmed elsewhere on this sheet (Rookie Gear, Premier, First Year Fresh, Phenom) but the specific player names weren't legible enough in the photo to state with confidence — read the card fronts and swap in exact names/comps before finalizing. Note: the four grouped rows above (RC #1-3, #4-6, #7-10, #11-12) each price MULTIPLE physical cards as a single line, so the card count and grand total on this sheet are a floor, not the true batch total — do not treat them as final until each card is itemized individually. Valuation only, nothing posted.
