

Basketball sell/lots — sort by team

293 cards · Scans 433-475 · HOLD, not posted · raw/ungraded July 2026 eBay-comp estimate

Total: \$294 – \$928 (typical ~\$599)

Sort verdict: lot material, organized by team for easy bundling. Base 2025-26 Topps/Chrome commons run \$1-4 raw even for current stars (confirmed via comps: LeBron \$1.50-4, Giannis \$0.99-2.24, Jokic \$1.15-2, Kawhi/Harden \$0.99-1.59) — nothing here individually clears a singles threshold. **Correction 2026-07-22:** the earlier note claiming Scan 436 and Scan 442 were a duplicate 9-card scan was wrong — re-verified all 15 original scans directly and that Salaün/Washington/Ighodaro/Monk/Isaiah Joe/Agbaji/Watson/Bane/Isaiah Thomas set is really Scan 433, a single unique scan with no duplicate. Scans 436 and 442 are two other, different real scans (Kyrie/Garnett/Kerr/Durant/Castle and DeRozan/Haliburton/Kuminga respectively). Quantities have been corrected accordingly (Isaiah Thomas x2, Nembhard x3, Ighodaro x3, Peyton Watson x2 base — not Chrome as first labeled). Team groups with 6+ cards (Pistons, Pacers, Grizzlies, Mavericks, Raptors) split cleanly into two 5-card-or-fewer lots each. **Scans 451-475 (~199 cards) are counted as one estimated bulk line for now** rather than itemized by team — that batch was large enough that a card-by-card team re-sort will follow once it's physically organized; the running total already reflects the full count. **Team/multi-player insert cards (duo inserts, team celebration cards) have been pulled OUT of every lot below** per JC's call — he's setting those aside to decide on separately later, so they no longer count toward any team's lot total or this sheet's grand total. HOLD: nothing posted, more scans pending.
