Lot Bundles -- 111 remaining cards

Bundle	Cards	Lots	Price
Play cards -- Battle Arena gameplay lot All 'PL####' strategy/effect cards from the third batch (Weapon Mixer, Frontload, Dead Red, etc.). These are functional game pieces with thin individual demand -- bundle by cost/element for playbook builders.	48	10 lots of ~5	\$9-12/lot
Unidentified character commons Everyone from the first two batches without a real-athlete match (Miracle, Chanesaw, Criscross, Muffin Man, Bayou, J-Jetts, Mcarmyknife, Shepherd, Darn Old, Majik Man, Shrouded, Judkernaught, Furnest, Jax-in-the-Box, First Leap, Hammer, Scary, Friday, Reindeer Hunter, Moose, Flippa, Hillicopter, Rypthillian, and duplicate copies of same).	63	~13 lots of ~5	\$6-10/lot

Grand total estimate: individual listings ~\$366.54 + lot bundles ~\$230-350 (26 lots x \$9-13 avg) ≈ \$647-717 combined ask, before eBay fees.

How to read this: prices are ASKING prices grounded in current active eBay comps for this card (not confirmed sold prices), so realized value will likely run below these numbers, especially for the base-parallel cards Amanda has (not the rarer Battlefoil/Skyline/Glow versions). Card counts were reconstructed from photo review across three separate scanning sessions -- please reconcile against the physical cards before anything is listed. Nothing here has been posted to eBay; say the word and I'll run a dry-run pass through post_from_scan.py first so you can see exact titles before anything goes live.
