Today's cleanup (Scan 232 + bad lots)

You flagged wrong pictures on Lot 10 and Lot 16. Reading the crops directly turned up a scan-numbering mess: several lots were showing cards that didn't match their titles. Fixed:

- **Lot 10** (307044329510): the "Cole Kmet" was fiction — that crop was actually a Tyleik Williams card *back* plus a Zay Flowers insert fragment. Scan 243 has no Kmet. Rebuilt as a clean 2-card lot: **Pat Bryant + Tyleik Williams**, \$6.99.
- **Lot 16** (307044256082): titled "Leonard Wingo Alexander Sanders" but pictured a totally different Prizm sheet. Rebuilt to match reality: **Kelvin Banks Jr RC, RJ Harvey RC, Tai Felton RC**, \$7.99.
- **Lot 17** (307044256122): same root cause. Rebuilt: **Caleb Williams, Jalen Royals RC, Mike Vrabel**, \$7.99.
- Pulled the two standout cards out as their own singles (your call):
 - — **Ashton Jeanty Prismatic RC** → new single 307044447834, \$17.99, Best Offer.
 - — **Joe Montana Prismatic** → was already listed as a single, so no duplicate; just removed from the lot.
- **Derwin James Jr** (Prizm Green, Chargers) was the one Scan 232 card never listed — now live: 307044468986, \$5.99.
- **Arch Manning** (307044329349) ended per your call; the fictional entries are documented and disabled in the plan source so they can't regenerate.

Why the pictures were wrong

The crop folder "Scan 232" held a Panini Prizm base/insert sheet (Kelvin Banks, Joe Montana, RJ Harvey, Derwin James, Ashton Jeanty, Tai Felton, Mike Vrabel, Caleb Williams, Arch Manning), but the plan had labeled those same slots as "Prizm Draft College" players (Ryan Wingo, Riley Leonard, etc.). The scan numbers got crossed during re-scanning, and auto-ID never caught it. Every card has now been read by eye and the listings match the actual cards.

Earlier in the batch (scans 221-249)

- ~88 listings posted across scans 221-249, singles + small lots, with a duplicate guard.
- Scan 231 fully re-verified by hand (auto-ID had 8 of 9 wrong).
- T.J. Watt false "1/1" removed; 4 Phoenix Contours relabeled by color, repriced \$12.99.
- Serials captured: Mason Graham 159/385, Bhayshul Tuten 654/899.

Still needs your attention

Duplicate zebra SALE. The Jameson Williams Zebra (Select) sold, then the old duplicate guard reposted it (only checked active, not sold listings), and the repost (307044329432) **sold again**. If you already shipped the first one, cancel/refund one of the two orders before the second ships.

Guard fix pending. The batch repost guard should also load SOLD titles so a sold card can't be relisted. (The daily oversell_guard.py already covers this by SKU; the batch script is the gap.) A read-only sweep today found 0 other active listings duplicating a sold card, so it's contained.

Suggested next steps

- Reconcile the duplicate zebra order (cancel/refund the second sale).
- Give me the go-ahead to ship the SOLD-title fix into the batch guard so this can't recur.
- If any other older lot looks off, point me at it — I'll read the crops and fix it the same way.
