Basis: raw/ungraded eBay estimates pulled 2026-07-13 from active asking prices (true sold prices run below asks). The Topps Chrome set is ~2 weeks old so prices are still settling. In BOTH sets the base cards are essentially bulk (better sold as lots than one-by-one). The real value sits in: Topps Chrome — the numbered Elbecca Voss /99 (1st appearance), the inserts, and the refractors; Marvel Beginnings — the three Red Supernova parallels and the die-cut/insert cards. Note: in Marvel Beginnings the base price is flat regardless of character; character premium only shows on scarce NUMBERED parallels (none numbered here). Not for sale — valuation only.
